

A I JAYASIMHA REDDY

Power BI Developer

Mobile: +91 9177423065 | Email: jayasimhareddy3497@gmail.com | LinkedIn: [jayasimha](#) | GitHub: [Git](#)

Professional Summary

Power BI & SQL Developer with 2.5+ years of experience delivering end-to-end business intelligence solutions, with Strong SQL skills in data querying and transformation using CTEs, joins, and temporary tables, driving data-driven decision-making and business performance. Skilled in designing scalable data models, building interactive dashboards, and developing advanced DAX measures to track critical KPIs, uncover trends, and support strategic insights.

Proven ability to optimize reporting, automate ETL workflows, and enhance dashboard performance, reducing turnaround time and improving efficiency. Experienced in collaborating with senior BI developers to implement Row-Level Security (RLS), ensuring data governance and secure access.

Business-oriented problem solver with strong stakeholder collaboration and requirement-gathering skills, translating complex data into meaningful insights. Worked cross-functionally with data management teams using Microsoft Loop and Whiteboard to streamline tasks and improve delivery efficiency. Recognized for analytical thinking, attention to detail, and consistent delivery excellence, with a growing interest in cloud analytics and data engineering.

Core Competencies

Technical Proficiency

- Programming & Analytics: DAX Calculations, SQL & Data Extraction, Python-Pandas, Numpy, Matplotlib, Seaborn
- Database Management: Multi-Source Data Integration, Power BI Service & Deployment, Row-Level Security (RLS), Access control, SQL-joins, Subqueries, CTEs, Window Functions, Triggers, Indexes
- Data & BI Tools: Power Query / ETL, Data Modeling (tabular / multidimensional / semantic / star/snowflake schema), Scheduled Refresh / Gateway, Power BI, Tableau, Qlik Sense, Alteryx, Integrating multiple data sources (Excel, CSV, databases, warehouses, cloud)
- Spreadsheet Analytics: Advanced Excel-Pivot Tables, VLOOKUP, Macros, Data Validation
- Version Control: Git & GitHub
- Other Tools: Jupyter Notebook, Google Sheets, VS Code, HTML/CSS

Functional Proficiency

- Business acumen: Data-driven mindset, Insight Generation & Storyboarding, requirement gathering, Stakeholder collaboration, translating business needs to technical specs
- Project Skills: End-to-end BI delivery (from data ingestion to dashboard delivery, deployments, maintenance)
- Collaboration: Agile, cross-functional teamwork
- Documentation: Documentation, Process standards, Best practices, Governance
- Statistical Concepts: Descriptive Statistics, Hypothesis Testing, Regression Analysis
- Analytics: E-Commerce sales & Churn Rate Analysis
- Soft Skills: Communication, Critical thinking and problem-solving, detail oriented

Professional Experience

Maxton Technology Private Limited, Bangalore

May 2024

Power BI Developer

Supported business and sales teams in solving day-to-day business problems using data-driven insights. Integrated and analyzed multiple data sources to present structured information that supports strategic decision-making and market understanding, while preparing datasets for business intelligence and reporting solutions.

Experienced in quantitative and qualitative analysis, contributing to market and competitive intelligence studies to identify trends and evaluate business performance. Assisted in building data models and generating insights for use cases such as customer analysis, product performance tracking, and pricing and trend analysis, supporting Power BI dashboard development and reporting.

Key Contributions:-

- Delivered Power BI dashboards and data-driven insights to support business and sales teams in tracking KPIs and performance.

- Extracted and transformed data from SQL Server, Excel, and CSV using SQL (joins, CTEs, temp tables) and Power Query, ensuring reliable datasets.
- Developed and optimized reports using DAX (MTD, YTD, QTD, YoY) to enable trend analysis and improve usability.
- Supported quantitative and qualitative analysis, contributing to market trends and business performance insights.
- Collaborated with stakeholders to gather requirements and translate them into data models and actionable insights.
- Used Python (Pandas, NumPy) for basic data analysis and validation to improve data quality.
- Automated reporting workflows, reducing manual effort and improving efficiency.
- Worked in an agile environment, using Jira, Microsoft Loop, and Whiteboard for task tracking and collaboration.

Internships

N.V. Data Systems Private Limited

Data Analyst Intern

November 2023 – April 2024

Assisted in data analysis and reporting activities by preparing datasets using SQL and Excel, supporting dashboard development and business performance tracking. Gained practical exposure to real-world analytics workflows, stakeholder requirements, and data-driven decision-making.

Key Contribution:-

- Supported in data preparation and reporting activities using Microsoft Excel, performing data cleaning, validation, and basic analysis to support business reporting needs.
- Supported data extraction and dataset preparation using SQL (basic queries and joins).
- Contributed to Power BI dashboard development by preparing structured datasets and assisting in visualization and report validation.
- Collaborated with senior team members to understand business requirements and analytics workflows.
- Assisted in documentation and data quality checks to ensure accurate and reliable reporting outputs.

Agile Capital Services

April 2022-June 2022

Marketing & Financial Strategies

- Developed and maintained a client database that tracked interactions and financial performance.
- Improved response times and service delivery, utilized by the team members for enhanced efficiency.
- Building networks with prospective clients and business partners to enhance business opportunities.

Projects

FMCG Sales Analytics & Customer Segmentation

- Analyzed FMCG sales data across 5+ countries, segmenting 10,000+ customers to identify purchasing patterns and sales trends.
- Performed EDA using SQL and Python to uncover customer behavior insights, improving targeted marketing effectiveness by ~18–22%.
- Built 10+ interactive Power BI dashboards using DAX, Power Query, and data modeling to support business decision-making.
- Applied market basket analysis to identify product combinations, increasing cross-selling opportunities by ~15%.
- Translated business objectives into analytical questions and communicated insights through interactive dashboards for data-driven decisions.

Consumer Behavior Strategies

- Evaluated the effectiveness of sponsorship initiatives within Coca-Cola's marketing campaigns; findings highlighted three primary factors contributing to increased brand visibility and customer engagement in targeted demographics.

Education

Post-Graduation: MBA

REVA University, Bengaluru

November-2022

Graduation: B.E (Mechanical Engineering)

New Horizon College of Engineering, Bengaluru

May-2019

Certifications & Portfolio: [GitHub](#)
