

A I JAYASIMHA REDDY

Data Analyst | Power BI Developer | SQL | Python | Business Intelligence

Mobile: +91 9347123065 | Email: jayasimhareddy427@gmail.com | LinkedIn: [jayasimha](#) | GitHub: [Git](#)

Professional Summary

Power BI & SQL Developer with 4+ years of experience delivering end-to-end business intelligence and analytics solutions. Skilled in advanced SQL querying and data transformation using joins, CTEs, and temporary tables to enable data-driven decision-making. Experienced in designing scalable data models, building interactive Power BI dashboards, and developing advanced DAX measures to track KPIs and uncover actionable insights.

Proven track record in optimizing reports, automating ETL processes, and improving dashboard performance to enhance operational efficiency. Collaborated cross-functionally with data management and business stakeholders using Jira, Microsoft Loop, and Whiteboard for requirement tracking, workflow coordination, and efficient project delivery. Experienced in implementing Row-Level Security (RLS) to ensure data governance and secure access. Passionate about expanding expertise in cloud analytics and data engineering.

Core Competencies

Technical Skills

- BI & Visualization: Power Bi(DAX, Data Modeling, Power Query, RLS, Dashboard Development, Deployment), Tableau, Qlik Sense
- Data Analysis & Programming: SQL(Joins, CTEs, Window Functions, Subqueries, Query Optimization), Python(Pandas, Numpy, Matplotlib, Seaborn)
- Data Modeling & ETL: Star & Snowflake Schema, Sematic Modeling, Data Transformation, Multi-Source Integration, ETL Processes
- Databases & Data Management: SQL Databases, Indexing, Triggers, Data Extraction, Access Control, Scheduled Refresh & Gateway
- Spreadsheet Analytics: Advanced Excel(Pivot Tables, Lookup Functions, Data Validation, Macros)
- Tools & Platforms: Power BI Service, Git & GitHub, Jupyter Notebook, VS Code, Google Sheets

Functional Proficiency

- Business & Stakeholder Understanding: Requirement gathering, translating business problems into analytical solutions, stakeholder collaboration, data storytelling & insight communication
- Analytics & Problem Solving: Exploratory Data Analysis(EDA), KPI definition, trend analysis, churn & sales analytics, hypothesis-driven analysis
- BI Project Delivery: End-to-end dashboard lifecycle – data ingestion, transformation, modeling, visualization, deployment, and maintenance
- Ways of Working: Agile collaboration, cross-functional teamwork, iterative development & feedback – driven delivery
- Statistical Foundations: Descriptive statistics, hypothesis testing, regression analysis
- Core Professional Skills: Communication, analytical thinking, problem-solving, attention to detail

Professional Experience

Maxton Technology Private Limited, Bangalore

November 2022 - Present

Power BI Developer

Supported business and sales teams in solving day-to-day business problems using data-driven insights. Integrated and analyzed multiple data sources to present structured information that supports strategic decision-making and market understanding, while preparing datasets for business intelligence and reporting solutions.

Experienced in quantitative and qualitative analysis, contributing to market and competitive intelligence studies to identify trends and evaluate business performance. Assisted in building data models and generating insights for use cases such as customer analysis, product performance tracking, and pricing and trend analysis, supporting Power BI dashboard development and reporting.

Key Contributions:-

- Delivered Power BI dashboards and data-driven insights to support business and sales teams in tracking KPIs and performance.
- Extracted and transformed data from SQL Server, Excel, and CSV using SQL (joins, CTEs, temp tables) and Power Query, ensuring reliable datasets.
- Developed and optimized reports using DAX (MTD, YTD, QTD, YoY) to enable trend analysis and improve usability.
- Supported quantitative and qualitative analysis, contributing to market trends and business performance insights.
- Collaborated with stakeholders to gather requirements and translate them into data models and actionable insights.
- Used Python (Pandas, NumPy) for basic data analysis and validation to improve data quality.
- Automated reporting workflows, reducing manual effort and improving efficiency.
- Worked in an agile environment, using Jira, Microsoft Loop, and Whiteboard for task tracking and collaboration.

Internships

N.V. Data Systems Private Limited | *Data Analyst Intern*

April 2022 – September 2022

Assisted in data analysis and reporting activities by preparing datasets using SQL and Excel, supporting dashboard development and business performance tracking. Gained practical exposure to real-world analytics workflows, stakeholder requirements, and data-driven decision-making.

Key Contribution:-

- Supported in data preparation and reporting activities using Microsoft Excel, performing data cleaning, validation, and basic analysis to support business reporting needs.
- Supported data extraction and dataset preparation using SQL (basic queries and joins).
- Contributed to Power BI dashboard development by preparing structured datasets and assisting in visualization and report validation.
- Collaborated with senior team members to understand business requirements and analytics workflows.
- Assisted in documentation and data quality checks to ensure accurate and reliable reporting outputs.

BEML (Technical Trainee), KGF

July – 2018

- Analyzed manufacturing workflows and operational processes across Hydraulic and Power Line divisions to understand production efficiency and equipment lifecycle.
- Observed data collection and reporting practices used for monitoring performance and quality control.
- Built foundational knowledge of industrial data analysis and process optimization concepts.

Projects

FMCG Sales Analytics & Customer Segmentation

- Analyzed FMCG sales data across 5+ countries, segmenting 10,000+ customers to identify purchasing patterns and sales trends.
- Performed EDA using SQL and Python to uncover customer behavior insights, improving targeted marketing effectiveness by ~ 18–22%.
- Built 10+ interactive Power BI dashboards using DAX, Power Query, and data modeling to support business decision-making.
- Applied market basket analysis to identify product combinations, increasing cross-selling opportunities by ~15%.
- Translated business objectives into analytical questions and communicated insights through interactive dashboards for data-driven decisions.

Consumer Behavior Strategies

- Evaluated the effectiveness of sponsorship initiatives within Coca-Cola's marketing campaigns; findings highlighted three primary factors contributing to increased brand visibility and customer engagement in targeted demographics.

Education

Post-Graduation: MBA

REVA University, Bengaluru

November-2022

Graduation: B.E (Mechanical Engineering)

New Horizon College of Engineering, Bengaluru

May-2019

Certifications & Portfolio: [GitHub](#)
